Translation to TFL

- Sentences with no connectives are easy to translate or symbolize (→):
 - ▶ It is cold \mapsto C
 - ▶ It is rainy $\mapsto R$
 - ▶ It is sunny \mapsto S
- The trick when symbolizing an atomic sentence is to:
 - Use a different letter for each sentence
 - Use the same letter whenever the same sentence reappears.

2/20

Caley Howland Lecture 5 9/25/17

Translation to TFL

- Sentences with just one sentential connective are also pretty easy:
 - ▶ It is cold and rainy \mapsto $C \land R$ [Notice the two atomic letters]
 - ▶ If it is cold then it's rainy $\mapsto C \to R$
- Sentences with more than one connective can become trickier.
 - ► Either it is sunny or it is cold and rainy \mapsto $S \lor (C \land R)$.
 - ▶ Notice that $(S \lor C) \land R$ would be incorrect.

3/20

Caley Howland Lecture 5 9/25/17

Translation to TFL

- The goal is to give the most precise (and fine-grained) TFL rendering you can, and try to come as close as possible to the meaning of the original.
- This week we will focus on translations.
 - For this purpose we will only touch on the meanings of the terms.
- Then the following week we will learn more about the meaning, or semantics, of sentential logic.
- After that, we will be in a position to evaluate arguments for sentential validity.

A Two Stage Process

- Sometimes, we will need to translate somewhat complicated sentences.
- It is useful to go through two separate stages:
- Stage 1 Replace all basic sentences (explicit or implicit) with atomic letters. Result: a sentence of "Logish", halfway between the two.
- Stage 2 Replace the remaining English connectives with their TFL symbols, and appropriately group them together with parentheses.

Use ∧ to symbolize many different English Words

 Caley Howland
 Lecture 5
 9/25/17
 7/20

- Use ∧ to symbolize many different English Words
 - and, yet, but, however, moreover, furthermore, in addition, both, on the other hand, etc.

 Caley Howland
 Lecture 5
 9/25/17
 7 / 20

- Use ∧ to symbolize many different English Words
 - and, yet, but, however, moreover, furthermore, in addition, both, on the other hand, etc.
- Lots of these words have more to their meanings than simply and.

 Caley Howland
 Lecture 5
 9/25/17
 7/20

- Use ∧ to symbolize many different English Words
 - and, yet, but, however, moreover, furthermore, in addition, both, on the other hand, etc.
- Lots of these words have more to their meanings than simply and.
 - For instance, "but" adds the idea that there is a contrast between the two conjuncts.

Caley Howland Lecture 5 9/25/17 7/20

- Use ∧ to symbolize many different English Words
 - and, yet, but, however, moreover, furthermore, in addition, both, on the other hand, etc.
- Lots of these words have more to their meanings than simply and.
 - For instance, "but" adds the idea that there is a contrast between the two conjuncts.
 - ► The following two sentences have different English meanings, but the same TFL translation.

 Caley Howland
 Lecture 5
 9/25/17
 7/20

- Use ∧ to symbolize many different English Words
 - and, yet, but, however, moreover, furthermore, in addition, both, on the other hand, etc.
- Lots of these words have more to their meanings than simply and.
 - For instance, "but" adds the idea that there is a contrast between the two conjuncts.
 - ► The following two sentences have different English meanings, but the same TFL translation.
 - **★** "John is left handed **and** John is smart" \mapsto *L* \land *S*

 Caley Howland
 Lecture 5
 9/25/17
 7/20

- Use ∧ to symbolize many different English Words
 - and, yet, but, however, moreover, furthermore, in addition, both, on the other hand, etc.
- Lots of these words have more to their meanings than simply and.
 - For instance, "but" adds the idea that there is a contrast between the two conjuncts.
 - ► The following two sentences have different English meanings, but the same TFL translation.
 - **★** "John is left handed **and** John is smart" \mapsto *L* \land *S*
 - ★ "John is left handed **but** John is smart" $\mapsto L \land S$

- Use ∧ to symbolize many different English Words
 - and, yet, but, however, moreover, furthermore, in addition, both, on the other hand, etc.
- Lots of these words have more to their meanings than simply and.
 - For instance, "but" adds the idea that there is a contrast between the two conjuncts.
 - ► The following two sentences have different English meanings, but the same TFL translation.
 - **★** "John is left handed **and** John is smart" \mapsto *L* \land *S*
 - **★** "John is left handed **but** John is smart" \mapsto *L* \land *S*
 - Only one of them implies something insulting about left-handed people.

Caley Howland Lecture 5 9/25/17 7/20

• TFL is limited in what aspects it captures of language.

 Caley Howland
 Lecture 5
 9/25/17
 8 / 20

- TFL is limited in what aspects it captures of language.
- When translating, we won't be trying to capture all of the meaning.

 Caley Howland
 Lecture 5
 9/25/17
 8 / 20

- TFL is limited in what aspects it captures of language.
- When translating, we won't be trying to capture all of the meaning.
- Just some of the most important and basic logical structure.

Caley Howland Lecture 5 9/25/17 8/20

- TFL is limited in what aspects it captures of language.
- When translating, we won't be trying to capture all of the meaning.
- Just some of the most important and basic logical structure.
- More advanced logics capture more of the meaning.

 Caley Howland

Connectives of TFL

Symbol	Sentence	Name/Function	Translation
_	$\neg p$	negation	not
٨	$p \wedge q$	conjunction	and
V	$p \lor q$	disjunction	or
\rightarrow	$p \rightarrow q$	conditional	If, then
\leftrightarrow	$p \leftrightarrow q$	biconditional	if and only if

Grouping Connectives

Scope

Whenever three or more TFL sentence letters appear in an TFL sentence, parentheses must be used to indicate the *scope* of The connectives.

Scope: Definition

Scope of a connective: Which sentences are connected by the connective.

- The scope of two place connectives will always be two sentences.
- The scope of negation is always the unit to the right.

Caley Howland Lecture 5 9/25/17 15 / 20
